## STARTERS

*Today's Special*

### Introduction & Motivation

Dig into the project's  
origins and the goals that  
stirred up our creative appetite.

🔑 Goal: Creating an application to allow user to share recipes and learn various new culture through their shared love of food and cooking.

🔑 Purpose: Create a global recipe sharing app.

🔑 Motivation: Ease the process of sharing and learning recipes by creating a platform to replace culinary books and web page filled with ads.

# Starter's Menu

**Why  
we  
need  
RecipeHub  
?**

Ingredients			
1)	No recipe books	2)	Platform to share love of cooking
3)	Easy to share	4)	Well-structured Ingredients
5)	No Extensive Research	6)	Building a community

## Main Dishes

Core Features and architecture

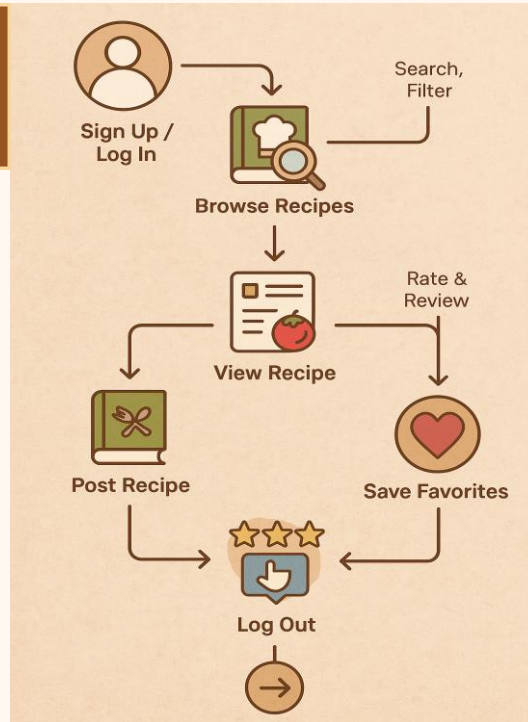

# “Key Features” Recipe

Ingredients	
½ lbs	Landing Page
1 tsp	Sign-up Page
2 tsp	Login-in Page
400 gms	Home Page
1 ½ tsp	Recipe Page
200 gms	Post a Recipe Page
2 lbs	User-Profile Page

# “Key Features” Recipe

Workflow:

# “Architecture” Recipe

## Ingredients

3 lbs Frond-end

1 tsp Back-end

2 lbs Database

**Frontend**  
HTML, CSS,  
JavaScript, Bootstrap

**Authentication**  
Flask-Login, bcrypt

**Reviews  
& Ratings**

**Database**  
MongoDB, Flask-PyMongo

**Recipe CRUD  
Operations**  
Flask routes

**API  
Integration  
& Deployment**  
TheMealDB,  
HTML2Canvas

## Spices & Garnishes

Technical Challenges & Solutions

# A Pinch of challenges:-

Spices	
1	Integrating external API(TheMealDB) with local DB
2	Managing User Authentications securely
3	Scaling Ingredients
4	Handling image uploads & serving from flask
5	Real-Time rating & reviews updates without reload

# “Our Secret Ingredients”:-

Solutions Served	
Ingredient 1	Used requests + json parsing; fallback cache
Ingredient 2	Auth: Flask-Login + bcrypt for hashing
Ingredient 3	Dynamic scaling: fractional math + regex parsing in backend
Ingredient 4	Image hosting: saved to /static/uploads; served via url_for
Ingredient 5	Async updates: AJAX for reviews & replies

# 06

## The Chef's Table

Future Works and Conclusion

## “Upcoming Dishes”:-

Our future plans	
Dish 1	 Advanced Search & Filters
Dish 2	 Mobile App Version (Android/iOS app)
Dish 3	 Collaborative Cooking (social features: follow chefs, share recipes.)
Dish 4	 Notifications & Reminders
And more....	"We're cooking up even more ideas to delight our users!"

# Conclusion:

## “Bringing it All Together”:

- RecipeHub Blends user-generated & API recipes
- User-friendly application
- “Thank you for dining with us! Hope you enjoyed the RecipeHub journey.”

**“Got questions? Or maybe... cravings?”**

**“Skip the Q&A—explore and taste with Recipe Hub.”**

**“Visit our app and discover what’s cooking!”**

**-TEAM SIGMA**
